

## Recommended Care for Rejuvapen

### Before Your Procedure

- No Acutane for the past 6 months.
- No Retin-A products 24 hours prior to your treatment.
- No autoimmune therapies or products 24 hours prior to treatment.
- Avoid unprotected sun exposure for two weeks prior to treatment. Treatment will not be administered on sunburned skin.
- Cold sore sufferers, we recommend you start taking an antiviral the day before your procedure. If you need a prescription, let your provider know.
- You will need a numbing cream and we use a compounded numbing cream that is available by prescription. We will call in a prescription for you at Infinity Compound Solutions at 1204 SE 28th St., #2, Bentonville, AR #479-250-1443.
- On the day of your treatment, please arrive with freshly cleaned skin.
- Please bring your compounding cream to your appointment.

### What Can Be Expected

- Immediately after your treatment you will look as though you have a moderate to severe sunburn.
- Your skin may feel tighter & warmer than usual. This normally subsides the same day or within 24-36 hours.
- You may see slight redness after 24-48 hours, but only minimally.

### After Your Procedure

- Cleanse your face thoroughly a few hours post treatment or before you go to bed with a mild cleanser using fingertips only. No Clarisonic brush or washcloth for 36-48 hours.
- Apply Biopelle Growth Factor ampoules before bed. Use one each night for seven nights, then one a week for three weeks.
- Apply hydrating products to moisturize the skin before bed.
- Apply a physical SPF 30 or above daily.
- Makeup can be worn after 24 hours and mineral makeup is recommended. Makeup brushes and sponges should be clean.
- Avoid direct sun exposure post treatment.
- Normal skincare can be resumed after 24-48 hours.

In rare occurrences, bruising may occur. This should subside within 36-48 hours. You may experience slight flaking or peeling of the skin after a few days. This is normal and should be expected. After a week, most patients notice that their skin is smoother and more radiant. After two weeks, you should start to notice subtle changes in your skin. After 28 days, you should see results. Rejuvapen treatments can be performed every 30 days.
