

Recommended Care for Botox/Dysport

Before Your Treatment

- Avoid alcohol, ibuprofen, aspirin, Ginko, Vitamin E and any anti-inflammatory medications five days prior to your treatment to decrease bruising.
- Please notify your medical provider before your treatment if you have any previous medical conditions or are on any medications, are pregnant or breast feeding.
- Please advise your primary care physician that you will be receiving this treatment.
- Please arrive for your appointment without makeup.

After Your Treatment

- No massaging or manipulating the area directly for 24 hours.
- Avoid strenuous exercise for 24 hours to decrease risk of bruising.
- Call your provider immediately if you have questions or concerns about your treatment.

Remember: It takes 4-7 days for Botox or Dysport to take effect

- Additional instructions: _____
